

Quickstart Tennis is a HIT!

The Lincolnshire Club will incorporate the Quickstart tennis method this fall for its entire **beginner junior program**.

Quickstart is the fastest way to master the game of tennis. Instruction is divided into levels.

Each level uses specific court and racquet sizes to focus on proper stroke production which allows young players to achieve competitive success quickly. Kids gain confidence by seeing immediate progress to make learning the sport **FUN!**

EQUIPMENT:

Just as kids need a court that suits their size, they also need the right sized equipment! That's why both the racquet and the ball are different from equipment suited for adults or advanced players.

BALL TYPES:

A standard tennis ball moves too fast, bounces too high and is too heavy for smaller racquets. Beginners need a ball that is equal to their playing abilities.

FOAM BALLS are used for multiple purposes.

Beginners learn form and are able to rally while even the most advanced players will practice strokes using a hand fed foam ball.

ORANGE BALL is a low compression ball for 10 & under. The ball will bounce higher and move slightly faster to challenge players.

YELLOW GREEN DOT BALL will challenge players to continue with proper form while competing in match play experiences. It is the last ball type before moving to the regular yellow tennis ball.

TENNIS RACQUETS:

Racquets are made in 2 inch increments beginning with 19 in length. The longest junior racquet is 25 inches. Young players require a racquet that is proportionate to their height & hand size in order to have racquet control. Our certified Quickstart tennis professionals are able to determine which racquet size is suitable for your child should you need assistance.

FREQUENCY:

Our recommendation for Quickstart tennis instruction will be determined by the age and maturity of the child. Two times per week is ideal for children ages 6 & up. *The more you play, the quicker your child will advance.*
